

splash[®]
■■■■ DRY

multifunction technical fabrics

WE INTRODUCE A NEW CONCEPT: THE
MULTIFUNCTION TECHNICAL FABRICS.

A WAY TO EXPRESS THE ENDLESS USES THAT **splashDRY**[®]
PUTS AT YOUR FINGERTIPS. THANKS TO **PERLAM**[®],
THE INTERMEDIATE WATERPROOF
AND BREATHABLE MEMBRANE, BOTH SIDES OF THE LAST
GENERATION NATURAL FIBER FABRICS **TENCEL**[®],
CAN BE KEPT ISOLATED. THIS WAY, WE GET DOUBLE
EFFECTIVENESS. FURTHERMORE, THE **TENCEL**[®] FIBER HAS
A HIGH MOISTURE ABSORPTION CAPACITY, THAT
COMBINED WITH THE MINIMAL SPACE THAT IT TAKES UP,
MAKES **splashDRY**[®] THE IDEAL PRODUCT FOR GYM,
SWIMMING POOL, AT HOME, AS TRAVELLING BLANKET,
FOR NURSERY, AND FOR ALL ACTIVITIES YOU CAN
IMAGINE.

Feels so right

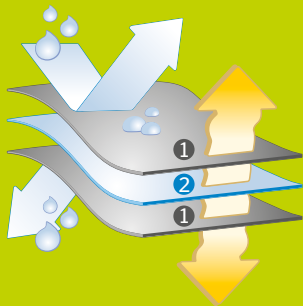

The TENCEL® fiber is 100% natural. It's the softest nanofiber, with the highest level of moisture absorption in the market. It breathes with the body and quickly absorbs and releases moisture, and maintains the body heat.

The cotton and the polyester only absorb 16%-19% of the moisture, in 3 minutes. However, the TENCEL® fiber absorbs the 100% of the moisture, in 20 seconds.

The intelligent PERLAM® membrane is waterproof and breathable. It quickly repels liquids and expels them to the outside, keeping the fabric dry. At the same time, it allows the body to breathe.

PERLAM® is a registered trademark, whose technology is only granted, under license, to the best textile firms.

- 1 TENCEL® fiber fabric
- 2 Waterproof and breathable PERLAM® membrane
